NCL Fall 2025 Team Game Scouting Report

Dear David Buehler (Team "SANS.edu 829"),

Thank you for participating in the National Cyber League (NCL) Fall 2025 Season! Our goal is to prepare the next generation of cybersecurity professionals, and your participation is helping achieve that goal.

The NCL was founded in May 2011 to provide an ongoing virtual training ground for collegiate students to develop, practice, and validate their cybersecurity skills in preparation for further learning, industry certifications, and career readiness. The NCL scenario-based challenges were designed around performance-based exam objectives of CompTIA certifications and are aligned to the National Initiative for Cybersecurity Education (NICE) Cybersecurity Workforce Framework published by the National Institute of Standards and Technology (NIST).

As you look to a future career in cybersecurity, we hope you find this report to be valuable in both validating skills and identifying areas for improvement across the nine NCL skills categories. You can use this NCL Scouting Report to:

- Validate your skills to employers in any job application or professional portfolio;
- Show case your achievements and strengths by including the Score Card view of your performance as part of your résumé or simply sharing the validation link so that others may view the detailed version of this report.

The NCL Fall 2025 Season had 8,520 students/players and 538 faculty/coaches from more than 490 two- and four-year schools & 200 high schools across all 50 U.S. states registered to play. The Individual Game Capture the Flag (CTF) event took place from October 24 through October 26. The Team Game CTF event took place from November 7 through November 9. The games were conducted in real-time for students across the country.

NCL is powered by Cyber Skyline's cloud-based skills evaluation platform. Cyber Skyline hosted the scenario-driven cybersecurity challenges for players to compete and track their progress in real-time.

To validate this report, please access: cyberskyline.com/report/DRFEX8D67UE9

Congratulations for your participation in the NCL Fall 2025 Team Game! We hope you will continue to develop your knowledge and skills and make meaningful contributions as part of the Information Security workforce!

Dr. David Zeichick
NCL Commissioner

2445 POINTS OUT OF 3000
PERFORMANCE SCORE

Average: 1098.3 Points

76.3% ACCURACY
Average: 56.1%

78.7% COMPLETION
Average: 37.8%

Cryptography
255 POINTS OUT OF 340 — 93.8% ACCURACY — COMPLETION: 83.3%

Identify techniques used to encrypt or obfuscate messages and leverage tools to extract the plaintext.

Enumeration & Exploitation
270 POINTS OUT OF 390 — 76.5% ACCURACY — COMPLETION: 39.4%

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in code and compiled binaries.

Forensics
140 POINTS OUT OF 300 — 80.0% ACCURACY — COMPLETION: 61.5%

Utilize the proper tools and techniques to analyze, process, recover, and/or investigate digital evidence in a computer-related incident.

Log Analysis
280 POINTS OUT OF 300 — 41.3% ACCURACY — COMPLETION: 95.0%

Utilize the proper tools and techniques to establish a baseline for normal operation and identify malicious activities using log files from various services.

Network Traffic Analysis
200 POINTS OUT OF 300 — 78.9% ACCURACY — COMPLETION: 71.4%

Identify malicious and benign network traffic to demonstrate an understanding of potential security breaches.

Open Source Intelligence
370 POINTS OUT OF 370 — 77.1% ACCURACY — COMPLETION: 100.0%

Utilize publicly available information such as search engines, public repositories, social media, and more to gain in-depth knowledge on a topic or target.

Password Cracking
285 POINTS OUT OF 325 — 100.0% ACCURACY — COMPLETION: 88.5%

Identify types of password hashes and apply various techniques to efficiently determine plaintext passwords.

Scanning & Reconnaissance
300 POINTS OUT OF 300 — 100.0% ACCURACY — COMPLETION: 100.0%

Identify and use the proper tools to gain intelligence about a target including its services and potential vulnerabilities.

Web Application Exploitation
245 POINTS OUT OF 275 — 100.0% ACCURACY — COMPLETION: 84.6%

Identify actionable exploits and vulnerabilities and use them to bypass the security measures in online services.

Note: Survey module (100 points) was excluded from this report.
Cryptography Module

Identify techniques used to encrypt or obfuscate messages and leverage tools to extract the plaintext.

Rules of Conduct (Easy)
30 POINTS OUT OF 30   **100.0%** ACCURACY   COMPLETION: **100.0%**

Introductory challenge on acceptable conduct during NCL.

Cruise Ship (Easy)
50 POINTS OUT OF 50   **33.3%** ACCURACY   COMPLETION: **100.0%**

Identify and locate a cruise ship by cross-referencing its itinerary with an EXIF timestamp.

Finding Room 47 (Easy)
50 POINTS OUT OF 50   **100.0%** ACCURACY   COMPLETION: **100.0%**

Use OSINT to research clues from an old puzzle book.

Tooling (Medium)
60 POINTS OUT OF 60   **85.7%** ACCURACY   COMPLETION: **100.0%**

Perform OSINT on an image using EXIF data and online research to find key information.

Still Controversial? (Medium)
80 POINTS OUT OF 80   **100.0%** ACCURACY   COMPLETION: **100.0%**

Investigate publicly available information on a company's data breach.

Guiding Light (Hard)
100 POINTS OUT OF 100   **66.7%** ACCURACY   COMPLETION: **100.0%**

Triangulate a location using EXIF timestamp data and shadow lengths.

Hash it Out (Easy)
40 POINTS OUT OF 40   **100.0%** ACCURACY   COMPLETION: **100.0%**

Generate hashes for passwords with the MD5, NTLM, SHA1 and SHA256 hashing algorithms.

Zeitgeist (Easy)
50 POINTS OUT OF 50   **100.0%** ACCURACY   COMPLETION: **100.0%**

Crack MD5 hashed passwords with a wordlist.

Peninsula-Password (Medium)
50 POINTS OUT OF 50   **100.0%** ACCURACY   COMPLETION: **100.0%**

Crack NTLM Windows Passwords using the EFF's wordlists.

DBs (Medium)
70 POINTS OUT OF 70   **100.0%** ACCURACY   COMPLETION: **100.0%**

Crack an NTLMv2 hash and Blake2b password to decrypt an MSSQL database.

Règles (Medium)
50 POINTS OUT OF 50   **100.0%** ACCURACY   COMPLETION: **100.0%**

Crack modified passwords from a leaked database using Hashcat's rule attack mode.

Magic (Hard)
25 POINTS OUT OF 65   **100.0%** ACCURACY   COMPLETION: **40.0%**

Crack passwords by creating a wordlist, augmenting permutation rules using known password complexity requirements.
